

# MAWER

## Investor Profile

Suited to investors seeking growth provided by capital appreciation of Canadian equities and with a long-term investment horizon. Investors should be able to accept a moderate level of risk.

## Investment Objective

To provide above average long-term returns by investing in securities of primarily mid-to-large capitalization Canadian companies.

## Investment Strategy

The fund intends to achieve its objective by systematically creating a broadly diversified portfolio of wealth-creating companies bought at discounts to their intrinsic value. They also seek to employ a long-term holding period to allow for investor recognition or corporate growth and to minimize transaction costs.

There are no specific limits on the portion of the funds' assets that may be directly invested in foreign securities or indirectly exposed to investments in foreign securities. As of the date of this document, the fund is focused on investing in Canadian securities and the Fund's exposure to foreign securities, if any, is only through indirect investments. The fund is not expected to invest more than 15% of total assets in foreign securities in ordinary circumstances.

To assist with objectives, the fund may also invest in or use derivative instruments, engage in securities lending, repurchase, or reverse repurchase transactions, and hold significant levels of cash as a temporary defensive tactic.
