

**Global Asset Management**  
**PH&N Institutional**

**Investor Profile**

Suited to investors seeking both growth and income through a combination of equities and fixed income securities and who have a medium to long-term investment horizon. Investors should be able to accept a low to moderate level of risk.

**Investment Objective**

To provide long-term capital growth and income by investing primarily in a well-diversified, balanced portfolio of common stocks, bonds and money market securities from anywhere around the world.

**Investment Strategy**

The fund intends to achieve its objective by having the underlying fund manager invest a significant portion or even all of the net asset value of the underlying fund in other funds managed by RBC GAM. The underlying fund manager believes that investments in high-quality common stocks represent an effective vehicle for creating wealth over the long term; that wealth preservation and income objectives are best met by balancing common stock and fixed-income investments; and that the cyclical nature of markets requires the timely adjustment of the mix of common stock and fixed-income investments to achieve superior investment results.

PH&N employs a strategic allocation approach, determining the appropriate asset mix within broad pre-established guidelines for each asset class. The target weights are currently as follows: 40% fixed income, 36% global equities, 20% Canadian equities, 4% emerging markets equities.

Environmental, social, and governance (ESG) factors are considered where material to investment decisions.
