

Global Asset Management
PH&N Institutional

Investor Profile

Suited to investors seeking moderate rates of return from interest income and capital appreciation provided by bonds and debentures who have a medium to long-term investment horizon. Investors should be able to accept a low level of risk.

Investment Objective

To provide relatively high yields and stability of capital by investing primarily in a well-diversified portfolio of fixed-income securities issued by Canadian governments and corporations.

Investment Strategy

The fund intends to achieve its objective by investing primarily in high-quality Canadian corporate bonds and government bonds issued in Canadian or U.S. dollars. In addition, the fund may also invest in asset-backed commercial paper. The fund aims to maintain an average term to maturity similar to the relevant benchmark index. The fund may invest a portion of assets in non-Canadian securities where such an investment is compatible with the investment objective of the fund. Although there is no specific limitation on the percentage of assets that may be invested in non-Canadian securities, the underlying fund manager does not expect that the fund will generally invest more than 30% of assets in non-Canadian securities.

Environmental, social, and governance (ESG) factors are considered where material to investment decisions.
