

## BLACKROCK

### INVESTOR PROFILE

Suited to investors seeking a passively managed portfolio of fixed income and equity investments who have an anticipated retirement date in or around the year 2060. Investors should be able to accept a moderate level of risk.

### INVESTMENT OBJECTIVE

To provide for retirement outcomes by investing in broadly diversified global assets classes with assets allocations becoming more conservative over time.

### INVESTMENT STRATEGY

The fund intends to achieve its objective by taking age-appropriate risk for investors expecting to retire around the year 2060. Investment is primarily in other BlackRock-managed index funds and exchange traded funds across the following asset classes: Canadian equities, U.S. equities, international developed market equities, international emerging market equities, Canadian fixed income, non-Canadian fixed income, real estate, commodities, alternative investments, and cash and equivalents.

It is expected that the fund will be merged with the Co-operators BlackRock LifePath Retirement Index Fund within five years of the date that its asset mix matches the asset mix of the Co-operators BlackRock LifePath Retirement Index Fund.
