

BLACKROCK

INVESTOR PROFILE

Suited to investors seeking higher capital growth over the long term and diversification outside Canada with exposure to the broad U.S. stock market. Investors should be able to accept a moderate level of risk.

INVESTMENT OBJECTIVE

To achieve long term growth by investing a diversified portfolio of U.S. equities.

INVESTMENT STRATEGY

The fund intends to achieve its objective by replicating the holdings and returns of the S&P 500 Total Return Index. This index represents 500 of the largest public companies in the United States. To closely track the S&P 500 Total Return Index, the fund invests in all 500 securities in the index close to their actual index weights. A small tracking error will be present due to foreign withholding taxes.

While the fund invests primarily in U.S. equities, it may also invest directly in other investments such as exchange traded funds and pooled funds to help achieve the objective of tracking the return and risk profile of the benchmark. Small amounts of cash and/or money market securities (generally less than 1%) may be held for liquidity or pending investment.
